

Gold Star Powders

Gold Star Brasil

Gold Star Powders is always keen to be as close as possible to our customers and their individual needs, with manufacturing facilities opened in India, Thailand and China in the past five years. Our latest overseas joint venture project is in São Paulo, Brasil.

Gold Star Brasil was founded in 2008. It produces the world famous Gold Star jewellery Investment Powders in São Paulo state, and distributes the complete range of investment powders, waxes, machinery and consumables to the continent of South America.

All of the Investment Powders are manufactured to the same recipes as those produced in the United Kingdom, and all powders will be subject to the same stringent quality checks. These include laboratory testing for expansion, gloss-off and setting times; each batch is also cast using both brass and silver before being allowed to be despatched to the customer.

Backed by the technical support and raw materials from the U.K., the entire continent of South America will benefit from having the highest quality casting powders manufactured locally.

Investment Powders
